These instructions assume that you already have Community Builder installed, configured and operational.

1. Download the attached zip file and extract the archive to a temporary location.
2. Copy the all files and directories to the directory of the in this folder: https://yourwebsite/components/com_comprofiler/plugin/user/plug_cbpaidsubscriptions/processors/payfast
3. Log in to the Administration area your Joomla website.

e.g. Enter "your website.com.au/administrator/index.php" in your web browser address bar, then enter your login credentials into the login screen.

4. Navigate to the "Components -> Community Builder -> Plugin Management -> CB Paid Subscriptions -> Payment Gateways" screen

5. In the "Payment Gateways/Create New" section, Select "Type of gateway:" and click "Payfast"

6. Input "Name of gateway account". Input your Merchant ID, Merchant Key and select Mode server details. You should obtain this information from your Payfast account area or directly from the Payfast Support team. Once you have entered all the data, click to save.

It is important to "Enable Payfast E-Payments" was chosen "Enable single payments"!!!

7. Gateway setup is complete. As a final confirmation, it is advisable to make a purchase from your website using the new Payment Gateway.
